

Main Report

High-Speed Ground Transportation for America

U. S. Department of Transportation
Federal Railroad Administration

September 1997

Table of Contents

CHAPTER 1: BACKGROUND.....	1-1
CHAPTER 2: HSGT IN ITS INTERMODAL CONTEXT	2-1
DEFINITION OF HSGT	2-1
IMPETUS FOR HSGT	2-1
Air Transportation.....	2-2
Highway Transportation.....	2-6
Summary: The Intermodal Context.....	2-9
CHAPTER 3: ANALYTICAL FRAMEWORK	3-1
HSGT PROJECTION TYPES	3-2
ANALYTICAL COMPONENTS AND THEIR USES	3-3
System Requirements and Performance.....	3-3
Comparisons of Benefits and Costs	3-5
PARTNERSHIP POTENTIAL DEFINED	3-7
ADDITIONAL MEASURES OF PARTNERSHIP POTENTIAL	3-8
Financial Measures.....	3-9
Benefit/Cost Measures	3-9
CASES	3-9
Technologies	3-9
Corridors	3-13
Matrix of Cases	3-15
CHAPTER 4: GENERAL ASSUMPTIONS	4-1
FINANCIAL ASSUMPTIONS.....	4-1
NATIONAL TRENDS.....	4-2
THE TRANSPORTATION ENVIRONMENT	4-3
Scope of Transportation	4-3
Trends in Other Modes.....	4-3
HSGT System Concept Assumptions	4-6
CHAPTER 5: METHODOLOGY—SYSTEM REQUIREMENTS AND PERFORMANCE	5-1
CAPITAL INVESTMENTS	5-1
Initial Investments	5-1

Continuing Investments	5-6
Areas of Uncertainty in Capital Cost Projections	5-7
TRAVEL DEMAND AND REVENUES.....	5-7
Overview	5-7
Step 1: Project Existing Modes <u>Without</u> HSGT	5-8
Step 2: Apply Diversion Models.....	5-10
Step 3: Develop Induced Demand	5-11
Steps 4 and 5: Total Demand and Transportation Revenue.....	5-12
OPERATING AND MAINTENANCE EXPENSES	5-13
Maintenance of Way	5-15
Maintenance of Equipment	5-15
Transportation	5-15
Passenger Traffic and Services	5-16
General and Administrative Expenses	5-17
ANCILLARY ACTIVITIES	5-17
Categories of Ancillary Activities.....	5-18
Analytical Treatment.....	5-18
CHAPTER 6: METHODOLOGY— COMPARISONS OF BENEFITS AND COSTS	6-1
TYPES OF BENEFIT/COST COMPARISONS	6-1
“TOTAL BENEFITS” AND “OTHER IMPACTS”.....	6-3
USERS’ CONSUMER SURPLUS	6-5
BENEFITS TO THE PUBLIC AT LARGE	6-6
Airport Congestion Delay Savings.....	6-6
Highway Congestion Delay Savings.....	6-7
Emissions Savings	6-8
OTHER IMPACTS: BACKGROUND INFORMATION	6-9
Transportation Items	6-9
Economic Development Items	6-11
Environmental/Energy Items	6-12
CHAPTER 7: RESULTS	7-1
SYSTEM REQUIREMENTS AND PERFORMANCE.....	7-1
Investment Requirements.....	7-1
Demand and Revenues.....	7-3
Operating and Maintenance Expenses	7-12

Synthesis: Investments and Operating Results.....	7-16
BENEFIT/COST COMPARISONS.....	7-23
Total Benefits Versus Total Costs.....	7-23
Benefits to HSGT Users Versus Costs Borne by Users	7-25
Benefits to the Public at Large Versus Publicly-Borne Costs	7-26
CHAPTER 8: SPECIALIZED ANALYSES	8-1
EXTENSIONS OF HSGT.....	8-1
Traffic Base	8-2
Extensions of Existing Accelerail Service in the Northeast Corridor.....	8-4
New HSR and Maglev Systems	8-7
“HYBRID” CORRIDORS	8-11
SENSITIVITY ANALYSES.....	8-13
Operating and Maintenance Expenses	8-13
Low-Fare Air Service	8-16
CHAPTER 9: CONCLUSIONS.....	9-1
SYSTEM REQUIREMENTS AND PERFORMANCE	9-1
COMPARISON OF BENEFITS AND COSTS	9-2
IMPORTANCE OF PARTNERSHIPS AND STATE ROLES	9-4

GLOSSARY OF SELECTED TERMS AND ABBREVIATIONS

STATISTICAL SUPPLEMENT

List of Tables

Table 3–1: Analytical Components in Relation to Projection Types	3-3
Table 3–2: The Accelerail Options.....	3-10
Table 3–3: Selected Inherent Advantages of HSGT Technological Options	3-13
Table 3–4: Cases Analyzed and Reported	3-16
Table 4–1: Underlying Population and Income Growth Rates from BEA	4-2
Table 4–2: Average Baseline Growth Projections for Existing Modes in CFS Corridors	4-5
Table 4–3: Comparison of Available FAA Forecasts With Air Baseline	4-5
Table 4–4: Comparison of Available FHWA Forecasts With Auto Baseline	4-5
Table 4–5: Summary of Technologies.....	4-7
Table 4–6: Fare Setting for the HSGT Cases	4-12
Table 5–1: Assumed Percent of Freight Locomotives Retrofitted with Cab Displays by Railroad Size.....	5-3
Table 5–2: Assumed Treatment of Grade Crossings.....	5-4
Table 5–3: Induced Demand in Other Corridor Studies	5-12
Table 5–4: Assumptions on Induced Demand.....	5-12
Table 5–5: Example of O&M Model Output for a Typical Case	5-14
Table 5–6: Equipment Maintenance Cycles for Steel-Wheel Options.....	5-16
Table 5–7: Overview of Ancillary Activities	5-19
Table 6–1: Total Benefits Versus Total Costs.....	6-1
Table 6–2: Benefits to HSGT Users Versus Costs Borne by Users	6-2
Table 6–3: Benefits to the Public at Large Versus Publicly-Borne Costs.....	6-2
Table 6–4: Development of Components of Total Benefits	6-4
Table 7–1: Initial Investment Cost Ranges for Illustrative Corridors	7-1
Table 7–2: Analysis of Difference in Unit Margins between New HSR and Maglev in Selected Corridors	7-19
Table 7–3: Surplus (Deficit) After Continuing Investments by Case.....	7-21
Table 7–4: Initial Investment by Case	7-21
Table 7–5: Total Benefits Less Total Costs	7-24
Table 7–6: Benefits to HSGT Users Less Costs Borne by Users	7-25
Table 7–7: Benefits to the Public at Large Less Publicly-Borne Costs.....	7-27
Table 8–1: Accelerail Projections for Northeast Corridor Extensions.....	8-5
Table 8–2: Accelerail Performance Comparison: Northeast Corridor Extensions Versus All Other Illustrative Corridors	8-6
Table 8–3: Ratios of Benefits to Costs for New HSR and Maglev Systems	8-7
Table 8–4: Results for Integral Systems: Empire/Northeast and Southeast/Northeast	8-8

Table 8-5: Comparative Results of Hybrid Option in California North/South Corridor.....	8-11
Table 8-6: Unit Operating Expenses for HSGT as Percent of Amtrak Long-Term Avoidable Unit Expenses in 1993.....	8-14
Table 8-7: Results of Sensitivity Analysis—Higher Operating Expense Assumptions.....	8-15
Table 8-8: Illustrative HSGT Corridors: Low Fare Air Service in Major Air Markets.....	8-17
Table 8-9: Estimated Effect of Lower Air Fares on HSGT Traffic Volumes in Two City-Pairs (New HSR Example—Florida Corridor).....	8-20

List of Figures

Figure 2-1: Domestic Air Travel: Long-Term Trends in Revenue Passenger-Miles, Population, and Income	2-2
Figure 2-2: Air Travel Comparisons — Average Annual Compounded Growth Rates by Decade	2-3
Figure 2-3: Airports Predicted in 2003 To Have 20,000 Hours of Annual Aircraft Delays	2-4
Figure 2-4: Automobile Travel – Long-Term Trends in Vehicle-Miles Traveled, Population, and Income	2-6
Figure 2-5: Automobile Travel Comparisons – Average Annual Compounded Growth Rates by Decade	2-7
Figure 3-1: Flow of the Analysis	3-1
Figure 3-2: Definition of Partnership Potential	3-8
Figure 3-3: The Illustrative Corridors.....	3-13
Figure 4-1: Nonstop Elapsed Time by Technology Over a 50-Mile Straight Course	4-8
Figure 6-1: Users' Consumer Surplus Concept	6-5
Figure 6-2: Concept for Airport Congestion Delay Savings	6-7
Figure 7-1: Initial Investment per Route-Mile: Maglev Examples	7-2
Figure 7-2: Line-Haul Running Times, Chicago—St. Louis	7-3
Figure 7-3: Initial Investment Per Hour Saved Over Amtrak 1993 Base Example: Chicago—Detroit.....	7-3
Figure 7-4: Composition of Each Mode's Total Travel Time Example: Chicago—Detroit City Pair	7-4
Figure 7-5: Competitive Position of HSGT in Three Sample City Pairs (Total Travel Time)	7-5
Figure 7-6: Fare Yields in the Chicago Hub Network	7-6
Figure 7-7: Fare Yield by Corridor, Year 2020 Example: New HSR.....	7-7
Figure 7-8: Percent of Intercity Auto Traffic Diverted to HSGT by Corridor	7-8
Figure 7-9: Percent of Intercity Air Traffic Diverted to HSGT by Corridor	7-9
Figure 7-10: Passenger-Miles, Year 2020, by Corridor	7-10
Figure 7-11: California North/South Corridor—Composition of Traffic Base by Option	7-11
Figure 7-12: System Revenues by Corridor and Technology Option.....	7-12
Figure 7-13: Operating and Maintenance Expenses Per Passenger-Mile	7-13
Figure 7-14: Operating and Maintenance Unit Expenses Versus Average Trip Lengths	7-14
Figure 7-15: Maintenance-of-Way Expense Per Passenger-Mile	7-14
Figure 7-16: Maintenance-of-Equipment Expense Per Passenger-Mile	7-15
Figure 7-17: Transportation Expense per Passenger-Mile.....	7-15

Figure 7–18: Passenger Traffic and Services Expense Per Passenger-Mile.....	7-16
Figure 7–19: General and Administrative Expense Per Passenger-Mile	7-16
Figure 7–20: Unit Margin for New HSR in Nine Illustrative Corridors.....	7-17
Figure 7–21: Comparison of Unit Margin Components: New HSR in the Northeast and California North/South Corridors	7-17
Figure 7–22: Unit Margins by Corridor	7-18
Figure 7–23: Range of Annual Operating Surpluses by Corridor	7-20
Figure 7–24: Percent of Initial Investment Covered by Surplus After Continuing Investments	7-22
Figure 7–25: Ratios of Total Benefits to Total Costs	7-24
Figure 7–26: Ratios of Benefits to HSGT Users, to Costs Borne by Users.....	7-26
Figure 7–27: Ratio of Benefits to the Public at Large to Publicly-Borne Costs.....	7-27
Figure 8–1: Composition of Empire Corridor Traffic Base	8-3
Figure 8–2: Composition of Southeast Corridor Traffic Base	8-3
Figure 8–3: Empire Corridor	8-4
Figure 8–4: Southeast Corridor	8-4
Figure 8–5: Annual Passenger-Miles (Million) Per Upgraded Accelerail 110 Route-Mile	8-6
Figure 8–6: Annual Passenger-Miles (Million) Per Upgraded Accelerail 125 Route-Mile	8-6
Figure 8–7: Annual Passenger-Miles Per Dollar of Initial Investment.....	8-9
Figure 8–8: Passenger-Miles (in Millions) Attributed to Southeast Corridor Proper	8-10
Figure 8–9: Average Trip Lengths for Traffic Attributed to Empire and Southeast Corridors Proper.....	8-10
